6-1 设计会议列表静态页面

140.143.132.225:8000/project-1/doc-98

一、设置模型层静态数据

message_list 页面显示的是审批通过的会议记录,并且会自动合并相同日期的会议到同一个列表中,整个页面还带有上划触底翻页功能。

在 message_list.vue 页面的模型层设置静态数据

```
1. return {
2.
       page: 1,
       length: 20,
       list: [
           {
               date: '2021年02月08日',
7.
              list: [
                  { id: 1, date: '2021/02/08', start: '08:30', end: '10:30', type: '线上会
   议', name: '张爽',place:"网络会议室", status:"未开始",title:'年终大会', desc:"年终总结大会"
                  { id: 2, date: '2021/02/08', start: '08:30', end: '10:30', type: '线上会
   议', name: '张爽', place: "网络会议室", status: "未开始", title: '年终大会', desc: "年终总结大会" }
10.
11.
           },
12.
           {
13.
              date: '2021年02月09日'
14.
              list: [
                  { id: 3, date: '2021/02/09', start: '08:30', end: '10:30', type: '线上会
15.
   议', name: '张爽',place:"网络会议室", status:"未开始",title:'年终大会', desc:"年终总结大会" }
16.
17.
           }
18.
       ],
19.
       isLastPage: false
20. };
```

2021年02月08日

输入会议标题	<u> </u>
日期	2021-02-07
开始时间	23:36
结束时间	00:36
会议类型	在线会议

会议内容
参会者(0人)。

保存

二、设计页面排版

```
    1. {
    2. "path": "pages/meeting_list/meeting_list",
    3. "style": {
    4. "navigationBarTitleText": "会议列表",
    5. "enablePullDownRefresh": false
    6. }
    7. }
```

设置消息列表视图层标签内容

```
1. <view class="page">
        <image src="../../static/logo-3.jpg" mode="widthFix" class="logo"></image>
 2.
        <view class="add">
 4.
            <image src="../../static/icon-17.png" mode="widthFix" class="icon"></image>
 5.
            <text>创建会议</text>
 6.
        </view>
7.
        <view v-for="one in list" :key="one.date">
            <view class="list-title">{{ one.date }}</view>
            <view class="item" v-for="meeting in one.list" :key="meeting.id">
                <view class="header">
10.
11.
                     <view class="left">
12.
                         <image v-if="meeting.type == '线上会议'" src="../../static/icon-</pre>
    11.png" mode="widthFix" class="icon"></image>
13.
                         <image v-if="meeting.type == '线下会议'" src="../../static/icon-</pre>
    12.png" mode="widthFix" class="icon"></image>
14.
                         <text>{{ meeting.type }}</text>
15.
                         <text :class="meeting.status == '未开始' ? 'blue' : 'red'"> ({{
    meeting.status }}) </text>
16.
                    </view>
17.
                     <view class="right">
                         <text>编辑</text>
18.
                    </view>
19.
20.
                </view>
                <view class="content">
22.
                    <view class="title">{{ meeting.title }}</view>
                    <view class="attr">
23.
                         <view class="timer">
24
25.
                             <image src="../../static/icon-14.png" mode="widthFix"</pre>
    class="icon"></image>
                             {\text{desting.start }} \sim {{\text{meeting.end }}} </{\text{text}}
26.
27.
                         <view class="creator">
28
                             <image src="../../static/icon-15.png" mode="widthFix"</pre>
29.
    class="icon"></image>
30.
                             <text>{{ meeting.name }}</text>
31.
32.
                         <view class="place" v-if="meeting.type == '线下会议'">
33.
                             <image src="../../static/icon-16.png" mode="widthFix"</pre>
    class="icon"></image>
34.
                             <text>{{ meeting.place }}</text>
35.
                         </view>
36.
                    </view>
                     <view class="desc">{{ meeting.desc }}</view>
37.
                     <button class="btn" v-if="meeting.type == '线上会议'">进入</button>
38.
39.
                </view>
40.
            </view>
41.
        </view>
42. </view>
```

```
1. @import url('../../style.less');
 2. .page {
        padding: 35rpx 45rpx;
        position: relative;
4.
 5. }
 6. .logo {
7.
        margin-top: 30rpx;
        margin-bottom: 45rpx;
